Description

I am trying to access the WFS of the City of Vienna, but am having no luck.

The WFS is here: <http://data.wien.gv.at/daten/geo?service=WFS&request=GetCapabilities>

I tried to insert in the dialog both:

- <http://data.wien.gv.at/daten/geo?>
- <http://data.wien.gv.at/daten/geo?service=WFS&request=GetCapabilities>

The error the user gets is a dialog with written "null" inside.

The error log is attached.

uDig loads the layers properly, so it seems to be more a gvSIG issue.
