Description

There are some missing translations in the new awesome "Scripting composer tools", such as menu, panels, tooltips and buttons.
For instance, the missing translations in menu duplicate some existing menu when the application language is not Spanish:

Hi Joaquín,

it would be nice and quite trivial to have translated only the three highlighted menus (Herramientas, Mostrar and Editar) at least for the final gvSIG 2.3.0 release. It would seem a more complete job and not a work in progress. A good way to present the new amazing Scripting framework and all its powerful capabilities.

#3 - 07/25/2016 06:36 PM - Antonio Falciano

- File menu_i18n.patch added

I attach a patch with the translation of menu.

#7 - 06/15/2017 02:57 PM - Álvaro Anguix

I change to new, because "fixed" it is not considered as open.

- Target version deleted (2.4.0-2850-final (rev. org.gvsig.desktop-2.0.220))
