Description

If we have a view with a WMTS layer, we get an error when we save the project, and it's not opened.

I've tested it with different WMTS servers.

I attach gvSIG.log file after saving the project.

History

#1 - 07/04/2016 03:38 PM - Antonio Falciano

- Target version set to 2.3.0-2437
- Status changed from New to Invalid

Hi Mario,

tested with different WMTS services (included yours) and it works in the latest testing build ([2436](#)), so it was fixed yet.

#2 - 07/07/2016 10:43 AM - Mario Carrera

- Status changed from Invalid to Closed

I've installed BN 2436 and it works now. I did it in a previous 2.3 build and in gvSIG 2.2, and there wasn't any ticket about WMTS correction.

I close the ticket.
