It seems that the issue is still present in build 2440, at least on win.

- Target version deleted (2.3.0-2447-final (rev. org.gvsig.desktop-2.0.153))

#5 - 08/22/2017 11:13 AM - Antonio Falciano

- Target version set to 2.4.0-2834 (rev. org.gvsig.desktop-2.0.201)
- Status changed from New to Invalid

The "Open file" dialog in the OGR tab of "Add layer" considers **always** the Geodata folder setting, but not the last visited folder at the moment (gvSIG 2.4.0 RC1). The behaviour should be the same of the Add button in the File tab.

I set this ticket as Invalid and open a new one (#4637).
