Description

I've tried loading a simple GeoJSON point file using OGR driver.
The layer is loaded and the attribute table can be correctly seen, but all the features are drawn in the same (wrong) location.

The GeoJSON file has been generated from OpenStreetMap using Overpass Turbo service.

Hi Cesar,

which build are you referring to? I've loaded the export.geojson file in the RC2 (win-x86_64) successfully. And it seems that all the features are georeferenced correctly. See the screenshot in attachment.

Hi Antonio, I am also using RC2 (linux 64 bits, Ubuntu 16.04 version).

I've tried loading the layer on a view using EPSG:4326, then also on another view using EPSG:3857 for the view and EPSG:4326 for the layer, with same result (a single point is drawn, or better: all the points are drawn in the same position).
