Operative System:		Add-on resolve build:	
Keywords:		Proyecto:	
Has patch:		Hito:	
Add-on name:	Unknown		

Description

Steps in order to reproduce the bug:

- download [edificio.zip](#) without unzipping it;
- open the OGR tab in Add Layer;
- search [...] the edificio.zip file and then type `/vsizip/` before and `edificio.shp` after in the Connection string (e.g. `/vsizip/C:\Geodata\edificio.zip\edificio.shp\edificio.shp`);
- click on Open, choose the only available layer (edificio) and finally click on Ok;
- once the edificio layer has been loaded in the view, right click on its layer name in the ToC and try to open its Layer Properties.
Result: a NullPointerException occurs.

PS: please assign this ticket to a new OGR category

History

#1 - 08/27/2016 07:09 PM - Antonio Falciano

The sample connection string should be `/vsizip/C:\Geodata\edificio.zip\edificio.shp` Sorry for the typo.
