Has patch:		Hito:	
Add-on name:	Unknown		

Description

When gvSIG is opening a lot of messages like the following are logged (I attach a full example)

```
WARN AWT-EventQueue-0 org.gvsig.andami.ui.mdiFrame.MDIFrame - Unable to find icon 'application-project-new'.
INFO AWT-EventQueue-0 org.gvsig.tools.swing.impl.icontheme.BaselconTheme - get('no-icon') icon not found
```

These warnings are a bit uncomfortable when reviewing the log searching for WARN/ERROR messages. It will be awesome if the icons that generate the error will be fixed.

I'm not sure what is the cause of these warnings, if anyone have any clue, maybe I can help to fix it.

History

#1 - 05/31/2017 10:43 AM - Joaquín del Cerro Murciano

- Target version set to 2.4.0-2817 (rev. org.gvsig.desktop-2.0.183)

#2 - 05/31/2017 10:53 AM - Joaquín del Cerro Murciano

- Status changed from New to Fixed

#3 - 06/11/2017 09:46 PM - Álvaro Anguix

- Status changed from Fixed to Closed
