#### Description

When we save a view as a georeferenced raster in Windows on a WMS service, an error appears at the end and the new image is not created.

It works correctly in Ubuntu.

I attach log file.

#### History

##### #1 - 09/25/2017 05:00 PM - Antonio Falciano

- Target version set to 2.4.0-2838 (rev. org.gvsig.desktop-2.0.205)

- Status changed from New to Closed

I've just tried to reproduce the issue in build 2837 and it works fine also in windows. I close the ticket.
