**Description**

Parece ser que la última versión 2.3.1 tiene algún problema con librerías nativas de gdal en Ubuntu 14.04:

```
ldd ./gvSIG/extensiones/org.gvsig.gdal.app.mainplugin/gdal/libgdal.so | grep not  
libopenjp2.so.7 => not found
```

La solución que he encontrado de momento es instalar la dependencia que falla de forma manual descargando el paquete de <http://packages.ubuntu.com/xenial/amd64/libopenjp2-7/download>
