gvSIG version: 2.4.0	Add-on build:
gvSIG build:	Add-on resolve version:
Operative System: Linux	Add-on resolve build:
Keywords:	Proyecto:
Has patch:	Hito:
Add-on name: Unknown	

Description

Workflow:

- load a raster map
- change the colormap to suite your needs
- define -9999 as nodata in the "Raster Properties" tab and click "save" + display nodata transparent (btw, I think that should be on by default)

Everything looks good in the map.

- close gvSIG and open it up again in the previously closed project
- the novalues setting is not kept and needs to be done again
