Hi Andrea,

I bet you were dragging and dropping a layer in a view. Generally, adding a description in the ticket would help all to understand how to reproduce the issue.

Duplicated of #4516

#3 - 07/24/2017 02:06 PM - Andrea Antonello

You are right, I never use another way to add data to the map, so I didn't notice and report.

Will do better next time... I hope :-)

Thanks for marking the duplicate.
