Description

Steps in order to reproduce the error:

- create and open a view in EPSG:4326;
- add a PostGIS layer defined in a different CRS than the view (e.g. EPSG:23032) as a first layer;

Results:

- an "Unable to reproject envelope with transf" error happens;
- the view is not zoomed to the layer extent;
- zooming to the layer extent, the layer is where it should be.

Corregido el calculo del envelope de las capas al ser añadidas desde BBDD.

El codigo calculaba el envelope de las capas antes de que a estes se le hubiese asignado la transformacion de coordenadas (ICoordtrans).
