Description			
There's a typo in the ST_DiferenceFunction class . It should be "ST_Difference" instead of "ST_Diference" everywhere, especially the OGC function name.

Antonio,

el uso del nuevo evaluador de expresiones es "**experimental**", de hecho los valores que lo seleccionan en las preferencias no persisten para evitar que un usuario lo deje seleccionado por defecto.

Se puede probar en caliente, sin reiniciar gvSIG.

Afecta a los tickets #4660 y #4671 de forma directa, pero aun no he evaluado el alcance de los cambios.
