Description

If I try to create a new shp layer, only point and multipoint geometry type are available. At least in the two latest builds (2838 and 2839).

Cierro el ticket con la correccion aplicada; pero no tengo claro que los resultados sean los que toca.

Con la correccion en el combo se presentan los tipos de geometria que el proveedor de shape dice que acepta, aunque no tengo claro si esos tipos que expone el proveedor de shape son los correctos. Si no es asi levantar otro ticket con lo que debería salir en el combo.
