<b>Add-on name:</b>	Unknown		

**Description**

If we double-click on the name of the field to write the sentence at the "Selector by attribute" it doesn't work. It adds the "[" and "]" to the field but we get an error.

If we delete "[" and "]" it works.

Example:  
RTT\_DESCRI = 'Primary Route' ---It works  
[RTT\_DESCRI] = 'Primary Route' ---It doesn't work

At the gvSIG.log any error appears.

### Associated revisions

#### Revision 43582 - 10/14/2017 10:01 PM - Joaquín del Cerro Murciano

refs #4708, corregido en el selector por atributos cuando debe usar corchetes para escapar el nombre de campo. Estaba escapando el nombre cuando encontraba un "\_" y en ese caso no hace falta.
