Add-on name:	Unknown		

Description

Steps in order to reproduce the issue:

- add a whatever layer in a view;
- right click on layer in the ToC and then click on "Add to locator".

Result: the layer is not added in the locator

Note: "Add to locator" works fine in build 2842

refs #4749, modificado el locator para que se inicialice el extent del view port con la primera capa que se cargue

History

Nota para mas tarde.

Al parecer la capa si que se añade al localizador, pero no se visualiza.

Si vamos a "vista->configurar localizador" la capa esta en el localizador.

Tengo la impresion que no esta haciendo un zoom a la capa al cargarla en el localizador.

Es curioso, si desde "Configurar localizador" le damos a añadir capa y cancelamos, ya se muestran las capas del localizador.

You're right, Joaquin. The layer is added to locator, but the zoom to layer is not applied. I've just verified with this little script:

```
# encoding: utf-8
```

```
from gvsig import *
```

```
def main(*args):
```

05/16/2024

```
view = currentView()
moc = view.getMapOverViewContext()
layers = moc.getLayers()
env = layers.getFullEnvelope()
moc.zoomToEnvelope(env)
```

#3 - 12/13/2017 01:57 PM - Joaquín del Cerro Murciano

- Target version changed from 2.4.0-2850-final (rev. org.gvsig.desktop-2.0.220) to 2.4.0-2846 (rev. org.gvsig.desktop-2.0.215)
- Assignee set to Joaquín del Cerro Murciano
- Status changed from New to Fixed

#4 - 01/03/2018 12:14 PM - Antonio Falciano

- Status changed from Fixed to Closed
