Description

clase RegExpOperator

Usa un:

```
exp = (Pattern) interpreter.getCache().get(this.getClass(), re);
```

Esto da error de primeras.

Con algo así se soluciona:

```
try {
    exp = (Pattern) interpreter.getCache().get(this.getClass(), re);
} catch (Exception e) {
    exp = null;
}
```

Pero no se si habría que corregir el get del DefaultInterpreter para que devuelva null en vez de una excepción
