Description

With a typical installation in windows, in the gvSIG root installation appears a **native** folder with some linux native libraries. This doesn't affect gvSIG in runtime, but the gvSIG installer for windows becomes much bigger than needed.

History

#1 - 04/12/2012 04:51 PM - Joaquín del Cerro Murciano

- Priority changed from Normal to Low

- Target version set to 2.0.0-alpha5

#2 - 04/18/2012 06:30 PM - Cesar Ordiñana

- Status changed from New to Closed

The error is not in the main installer but in the base raster support packages.

Created a new ticket #545 and closing this one.
