Has patch: No	Hito:
Add-on name: Application gvSIG (org.gvsig.app)	

Description

You may select the GTK+ look and feel which takes the configuration from the system where the application is running. If bigger fonts are used by the user, the view properties window seems to have some fixed sizes and does not adapt to the new font sizes, even when maximized.

Test the behavior also with the Nimbus L&F (Java >= 1.6)

Revision 38112 - 04/17/2012 12:05 PM - Cesar Ordiñana

Use GridBagLayouts and rely on the default component preferred sizes. This way the components work mostly on any Java L&F.
Fixes #528
