Description

The dialog box ask for a "Field" but it's not clear what it does. In gvSIG 1.11 there was the possibility of take the buffer distance from the data stored in a field of the attribute table but it seems is not the same in this case.

The combo-box shows all the fields of the attribute table (whatever the type), including an extra field called "geometry" which doesn't appear when we open the attribute table.

Depending on what this control should do I will open new issues.

I attached a screenshot of the buffer dialog box in gvSIG 2.0

History

#1 - 05/10/2012 03:03 PM - Manuel Madrid

- Target version set to 2.0.0-rc1

#2 - 05/30/2012 02:25 PM - Joaquín del Cerro Murciano

- Assignee set to Ignacio Brodín

- Target version changed from 2.0.0-rc1 to 2.0.0-alpha6

#3 - 06/06/2012 11:32 AM - Ignacio Brodín

- Status changed from New to Fixed

The main problem is the field distribution in the GUI. SEXTANTE distributes these fields without programmer intervention. I have changed the labels for clarified a little bit the meaning but I think that we will have to update the user manual. Moreover this GUI does not permit labels with long text.

If you introduce a numeric distance then the field selected has not effect else will be valid the numeric distance.
