#### Description

Probando con el repositorio en Oracle y un servidor web local.

He seguido el procedimiento del manual para configurar la autenticación de usuarios (tablas VCSGISREPO\_CONFIG y VCSGISREPO\_USERS)

Al intentar añadir la tabla a la copia de trabajo no pide la identificación de usuario. En la propia ventana sale el error de "Can't get repository tables metadata".

Si tengo abierta la ventana del "Servidor VCSGIS", sale el error: "Entities failed. error 20, User 'null' is not authenticated.

Y en el log:

```

Si busco cambios con la ventana de "Mostrar cambios" sí pide usuario y contraseña y luego funciona "Añadir tabla a la copia de trabajo"

WARN 631764 VCSGisAddToWorkingCopy org.gvsig.vcsgis.swing.impl.addToWorksp

Al cerrar conexión, en la ventan de "Añadir tabla a la copia de trabajo" no vuelve a pedir usuario. En la de "Mostrar cambios", sí.
