Description

For some users the installing options are a little bit confusing. It would be interesting to add some help text for each of them:

1. Standard installation -> proposed help text: "Install addons contained in the gvSIG standard distribution".
2. Installation from file -> proposed help text: "Install addons contained in a .gvspki or .gvspks file".
3. Installation from URL -> proposed help text: "Install addons from a remote repository".
