Description

Loading the same layer with the tile cache option and without it gives a different result.

Do the following first not checking this option and secondly checking it:

1. Add WMS layer
2. Type URL: <http://inspire.cop.gva.es/mapserver/wms>
3. Expand the folder "Básica".
4. Select the layer "Cartografía básica completa de la Comunidad Valenciana".
5. Select png and 23030. Accept.

I attached both screenshots. The correct appearance is the one called "WMS_sin_teselas.jpg"

It seems Alicante province has been rendered in a different scale than Valencia and Castellón.

History

#1 - 07/10/2012 08:19 AM - Ignacio Brodín

- Status changed from New to Fixed
- Target version set to 2.0.0-devel-2050

gvSIG-raster:r1144

There was a problem building the pyramid levels in WMS and WCS so the resolution levels were not correct

#2 - 08/27/2012 02:13 PM - María Maluenda

- Status changed from Fixed to Closed

Closed in the gvSIG build 2051
